

The First Name In Trailers®

3000R®

MULTI-TEMP

#1 SELLING
REEFER
IN
NORTH AMERICA
SINCE 1994

EXCELLENCE IS OUR STANDARD

Utility understands that every Multi-Temp reefer owner has unique operational requirements. Our existing solution base is expansive and can meet most of our customers needs, but when it can't, we invent a new solution with your needs in mind. Creative thinking, embracing new technology and starting with the industry's finest refrigerated trailer, the 3000R® gives you an advantage when customizing a trailer for multi-temp service. We only believe in sound, proven technologies and will always have your best interests in mind when you invest in the industry's best multi-temp reefer.

Severe Service Kingpin & Approach Plate Section

Designed with a thicker approach plate and kingpin plate to minimize damage during heavy duty service operations and reduce repair costs.

Stainless Steel Wingplates

Stainless steel wingplates with collared holes and embossed ribs minimize maintenance expenses from road de-icing chemicals and improve overall image.

Stainless Steel Vertical & Horizontal Dock Bumper

Easy-to-clean, corrosion resistant stainless steel dock bumpers creates a clean look that increases resale value and trailer life.

Walk Ramps from All Major Suppliers

Most manufacturers' ramps are available for installation at the factory in both side door and rear door configurations for greater loading and unloading ease.

Anti-Dock Walk Devices & Dump Valves

A variety of anti-dock walk devices and dump valves may be employed to stabilize the trailer during loading and unloading, creating a safer work environment.

Tire Inflation Systems

Most manufacturers' systems are available to maintain optimum tire pressure for improved fuel economy, maximized tire life and lower overall fuel costs.

Wide Track Suspension for Wide Base Tires

The wide-track system is available for use with single wide base tires. It features 6" wider spring centers for greater stability and improved tracking.

Air Return Bulkheads

A wide variety of air return bulkheads are available to fit all types of refrigeration units. Several different styles of pallet stops are also available.

CenterSeal® Load Partition Device

The thermally-efficient CenterSeal® load partition device allows for multiple zones inside a trailer for increased load versatility and efficiency.

Electric Stand-by Refrigeration Units

Operating an electric stand-by during the pre-cooling or when stationary yields significant fuel savings that adds to your bottom line.

Factory-Installed Refrigeration Units & Accessories

Utility offers installation of all models of refrigeration units, both standard single temperature units and all versions of multi-temp refrigeration units.

Front Corner Protectors

Aluminum diamond plate protectors offer protection against potential high clearance obstructions for reduced maintenance and repair costs and increased trailer life.

Multiple Strip Curtain Configurations

Strip curtains at side or rear door decrease fuel consumption costs and provide greater temperature control by minimizing air loss for greater fuel savings and increased profits.

Multi-Temp Load Partition Systems

Multiple trailer compartment configurations protect temperature sensitive cargo and increase trailer utilization for better operational efficiency and increased profits.

Remote ERC Switches

Shuts reefer unit off when an open door exposes the inside of the trailer to the ambient environment. Provides increased fuel savings and adds to your bottom line.

Remote Evaporators

Factory-installed remote evaporators are available in a variety of locations for all multi-temp trailer requirements.

Shore Power Plug at Rear

The highest quality plug and wiring system in the industry. In addition to greater fuel savings during operation, multiple grounding features improve safety.

Temperature Management Systems

Multiple systems available at the factory with both preparation and/or installation to protect products and ensure quality during transportation.

Exterior Rub Rails

Constructed from heavy duty aluminum to protect the exterior side skin from casual damage for lower maintenance costs.

Grab Handles

Stainless steel, aluminum and chrome grab handles are available in a variety of styles for improved driver safety.

Roll Up Door Installations

Utility offers roll up doors from most manufacturers to meet the needs of your operation.

Stainless Steel Electropolished Lock Rods

Electropolished stainless steel produces a corrosion resistant, easy-to-clean polished finish for improved appearance and increased resale value.

Tri-fold Rear Doors

Patented barrier design for tight clearance conditions to meet the need for a smaller door opening and lower heat loss.

Factory-Installed Rear & Side Door Lift Gates

Utility offers high quality lift gate installation from most manufacturers to provide you a fully operational trailer direct from the factory.

The First Name In Trailers®

Retractable Platforms & Stairs

A wide variety of platforms, stairs and steps, from leading manufacturers, are offered for better access to the trailer from the side doors.

Side & Rear Steps

Available from most manufacturers in an array of styles; side steps and rear steps improve operator safety and provide ease of accessibility.

Side Doors

Available for positioning in a variety of locations to increase compartment accessibility and meet your operational requirements.

Customized Floor Systems

Multiple floor systems are available including dairy and knurled styles, and extended service floors with extra-thick upper wear surfaces in both duct and flat top dry freight styles.

Custom Wearbands

Multiple heavy duty aluminum, HDPE plastic, Versitex and Armortuf high impact plastic wearband options are available to fit your operation's needs for a more durable trailer.

Recessed Logistic Track

Our recessed logistics track allows customers to use a variety of load restraining devices (straps, load bars, etc.) without sacrificing inside width.

Severe Service High Impact Linings

Thicker high impact linings from both US Liner and Crane Composites are available for severe service operations.

Verta-Lock® Vertical Shoring System

PATENTED Exclusive to Utility, this unique patented floor-to-ceiling load restraining system is used with specially designed spring loaded vertical shoring bars providing total load securement and flexibility for diminishing loads.

Clearance Light Packages

An array of LED clearance light models and configurations are available to meet the needs of your operation.

Electrical System Options

Multiple dome light packages, tracking systems, remote thermostats, tire pressure monitoring systems and other state-of-the-art technologies are available factory-installed.

LED Dome Lights

High output LED lights have lower current draw. LED dome lights have increased life and operate equally well in both high and low temperatures.

Factory-Installed Decals

The highest quality decal installation available is completed at our factories so your trailer is ready to operate as soon as you pick it up.
